Discontinuities: extremely closely to very closely spaced, horizontal, rough and smooth with some orange staining and occasional gravelly clay infill up to 30mm thick. 60 degrees, rough, with some orange staining and occasional clay infill <1mm thick. Vertical, planar, rough with occasional iron staining and clay infill <1mm thick. | | |

Discontinuities: extremely closely to medium spaced, horizontal and subhorizontal, rough with orange discolouration penetrating up to 20mm into rock, but generally around 5mm. Vertical and subvertical, undulating, rough with common brown and orange staining and occasional clay infill up to 2mm thick. Fracture runs throughout length of stratum. | | |
