

RECORD OF WELL (SHAFT OR BORE)

At Pilboly Colliery - Biggin Farm
Town or Village Pilboly
County Derbyshire Six-inch quarter sheet 21 SW
For Mr. N. C. B.

SK 44714 62621
1962

Exact site of well SK 44714 62621 (coordinates 64471 6262 for
classification purposes)

(Attach a tracing from
a map, or a sketch-
map, if possible.)

Level of ground surface above sea-level (O.D.) _____ feet.

Is well-top at ground level? _____ If not, state how far above ; _____ feet.
below ; _____ feet.

Shaft _____ ft., diameter _____ ft. Details of headings _____

Bore 338 ft.; diameter of bore: at top 8 1/2 ins.; at bottom 6 ins. + 338' - 316'

Lengths, diameters, perforations, etc., of lining tubes Cased with 7 1/2" outside diameter
tubing which was grouted in.

Water struck at depths, below well-top, of (feet) _____

TEST DETAILS { Rest-level of water _____ ft. above
below well-top. Suction at _____ ft. Yield on _____ hours'
days'
Month _____ pumping _____ gallons per _____ (max. capacity of pump _____ g.p.h.),
Year _____ with depression of _____ feet. Recovery to _____ in _____ mins.
hours.

WORKING CONDITIONS { Rest-level of water in _____ (month), _____ (year), _____ ft. above
below well-top.
Highest " in _____ (month), _____ (year), _____ ft. above
below "
Lowest " in _____ (month), _____ (year), _____ ft. above
below "
Suction at _____ ft. Rate of pumping _____ galls. per _____ for _____ hours per day.
with average depression of _____ ft. Recovery to _____ in _____ mins.
hours

Quality of water (attach copy of analysis if available) _____

Well made by Cementation Co. Ltd Date of well Dec 1951 - Feb 1952

Information from _____

ADDITIONAL NOTES.

Water from Westphalian A Rock. D. July 1981
Our site for this well (near SK 447 626) comes from a field map in
the Open-cast series, where it is entered with a quarry.
No core taken; no log made.
To provide a water supply to underground workings at Pilboly Colliery
N.C.B. North Derbyshire Area at Bolsover. Supplied full grid reference as above.

LOG OF STRATA OVERLEAF.

PILSLEY COLLIERY

SK 46SW/12

Shafts at this pit are confused in the Recce.

An NCB abandonment plan of the shafts marks 4 of them:

No.1 Shaft [4260 6304] has a twin at [4261 6305]

No.2 Shaft [4263 6313] is the northernmost

No.3 Shaft [4260 6310] lies between them.

London map shows only three shafts,

No.1 = (a) at 42606305
No.2 = (b) at 42646314
No.3 = (c) at 42626310 } and these appear on this list.

Our wartime Recce map shows No.1 near 4258 6308
and a group of 4 between 42636313 and 42676310, of which No.3 is
north-west of No.2.

SK 46SW marks only two shafts, at 42636311 and 42656310, of which
the log is said to fit the north-west one.

Our site map has 3 shafts

A at 42606308
B at 42636312
C at 42606308 } evidently a rough approximation to the NCB plan.

Our memoir gives 426 631, no doubt because of the confusion.
