4.00-4.33	100	0	0	0	25/16,10,29,50 SPT 25'/75 105/256		(0.54)	Weak locally very weak and moderately weak light grey brown SILTSTONE. Discontinuities are extremely closely to very closely spaced randomly orientated smooth and rough with some clay coating <1mm and some black staining.				
4.00			0	0								
4.22						171.03	4.22					
								Weak locally very weak and moderately weak light grey and light brown MUDSTONE. Fractures are subhorizontal (25 degrees) smooth, stained black. Vertical fractures are planar, smooth with some clay infill 1mm thick and some black staining. Randomly orientated fractures are extremely closely to closely spaced rough and smooth with some clay coating <1mm.
