6.00										
	100	0	0	0		123.25	6.00	Poor recovery. MADE GROUND. Grey and brown slightly sandy clay and slightly clayey, sandy gravel of sandstone. Sand is fine to coarse, gravel is subangular to subrounded, fine to coarse.		
7.30-7.61 7.30					25/12,13,16,9 SPT 25'/75 50/239		(1.30)			
	87	23	0	0		121.95	7.30	MADE GROUND. Black slightly sandy, slightly gravelly CLAY. Sand is fine. Gravel is subangular to subrounded Below 7.60m; black peaty fine sand with some coal, fine and medium of mudstone and coal. With occasional thin laminae of coal.		
						121.30	7.95	MADE GROUND. Stiff grey slightly sandy CLAY with subangular to subrounded fine to coarse weathered mudstone fragments. With pockets of yellow silt/fine sand.		
8.80 8.80-9.11					25/4,19,23,4 SPT 25'/75 30/10/2006:DRY		(0.85)			
	92	73	47	0	30/10/2006: 50/230 30/10/2006: 31/10/2006:	120.45	8.80	Very weak laminated to very thinly bedded grey MUDSTONE, locally stiff grey clay with very weak mudstone lithorelics. Fractures are randomly orientated, very closely spaced, tight, irregular and slightly rough with iron staining penetrating up to 20mm.
