

Form P.70 (Series 610)

SECTION OF RAMCROFT NO. 6 UNDERGROUND BOREHOLE

PURPOSE To prove reserves in the 2nd Waterloo Seam.

EXACT SITE Nat. Grid Reference E.445945

N.368235

LEVEL AT WHICH bore COMMENCED RELATIVE TO 0.8. \_\_ 740 ft. B.O.D.

DATE OF SINKING OR BORING July/August 1965

## Borehole Data and History

Ramcroft Colliery No. 6 Underground Downbore Borehole:

Approximate Location: 800 yds. N.15°E of Ramcroft Colliery

N.C.B.

National Grid Reference: E.445945 N.368235

6 -inch Sheet S.K. 46. N.E.

Level of origin: Floor of First Waterloo Seam 739.9 ft. B.O.D.

5th August, 1965. 23rd August, 1965 Date of drilling: Commenced Finished

Boremaster: C. Gray.

Contractor:

Depth (ft) Diam. of Core (in) Diam. of Hole (in)

 $0 - 21\frac{1}{2}$ Open hole

21월 - 95 \* 2.7/8

Drilling Difficulties: None

Method of sealing off

Cement Plug borehole:

Purpose fulfilled by borehole: To prove reserves in Second Waterloc

2 hotes pur down 1-3 apart. Both cemen sealed.

3774

hous were also willed @ and to 106 ( pour one) N 368 23 2" one Lo . 58'7 (cowings). 1-6" apart Hites comen filled
